

ABSTRACT OF THE INVENTION**ORAL MEDICINE DISPENSER**

5 The present invention provides an oral medicine dispenser for the administration of a single pre-measured dose, which dispenser comprises a body having a collapsible reservoir portion and an elongate dispensing tube portion extending from the reservoir portion, wherein the reservoir portion holds, in use, a single dose of a fluid oral medicament and the dispensing tube portion has an end cap, whereby on opening of

10 the end cap the collapsible reservoir portion may be manually squeezed to collapse the reservoir portion sufficiently to dispense substantially all of, or at least a major part of the medicament dose through the dispensing tube portion.
